Taking a test in Canvas with Respondus LockDown Browser

Canvas is the new Learning Management System (LMS) that is replacing eCollege. All online classes will be utilizing Canvas starting Summer 2016. Canvas should be opened in a browser such as FireFox, Chrome or Safari. The use of Internet Explorer is not recommended with Canvas. Respondus LockDown Browser is used in conjunction with Canvas for testing purposes. Respondus LockDown Browser <u>WILL NOT</u> allow you to open any other internet pages, print, or close until the test/quiz is submitted.

Respondus LockDown Browser is only intended to be used for testing purposes. For all other class elements such as assignment, discussions, etc., log into Canvas using your preferred browser such as FireFox, Chrome or Safari. The use of Internet Explorer is not recommended with Canvas.

Please note: Respondus LockDown Browser **WILL NOT** work with Chromebook.

The following pages are detailed instructions on the use and installation of Respondus LockDown Browser.

- 1. All coursework except tests and quizzes should be done in FireFox, Chrome, or Safari
- When you open a class, the tests/quizzes that require Respondus LockDown Browser will be indicated. In the example below, the test "Dirt is dirt" requires Respondus LockDown Browser, but the test "Exam 1" does not.
