Welcome to the Miles Community College Registered Nursing Program! You are embarking on a journey that takes you from novice to beginner to expert. The journey begins with your basic nursing education and continues throughout your nursing career.

Your enrollment in the Miles Community College Nursing Program initiates a two-way partnership between the nursing faculty and you, the student nurse, to acquire a basic education in Registered Nursing. In this partnership, the nursing faculty's responsibility is to serve as facilitators of learning, providing a supportive environment in which concepts are applied to a variety of problem-solving situations. Faculty provides evaluation to the student and direction for further learning. As a student, your responsibility within this two-way partnership is to utilize all of the available resources to learn and to apply the concepts presented and to seek counsel from the nursing faculty regarding academic and clinical practice needs.

The purpose of the policies provided in the Miles Community College Nursing Program Student Handbook is to provide a learning environment that is supportive, equitable and safe for all involved in the learning process. We wish you success in your pursuit of the Associate of Science Degree in Registered Nursing!

The Miles Community College Nursing Faculty and Staff

## **MILES COMMUNITY COLLEGE REGISTERED NURSING PROGRAM**

### **Mission**

The Miles Community College Nursing Program reflects and supports the mission and objectives of the College. Miles Community College promotes student success and lifelong learning through accessible, quality Programs and community partnerships. The College's strategic initiatives are to, 1) Student Experience: Provide a quality student experience--both curricular and extra-curricular. 2) Enrollment: Ensure stable levels of enrollment, including retention and completion. 3) Funding: Secure sustainable funding. 4) Reputation: Enhance the College's reputation. 5) Innovation: Foster innovation with technology, facilities, and equipment.

### **Nursing Program Guiding Principles**

People are holistic beings who grow, develop, and adapt throughout the lifespan. The faculty of the Nursing Program believes that people, as members of the global society, are endowed with intellects and capacities which direct them toward uniqueness, autonomy, and self-fulfillment with dignity. People have rights, privileges, and responsibilities as members of the family, the community, and the global society. Individuals are further impacted by economics; urban and rural settings; and cultural, ethnic, or religious orientation.

Health is a dynamic state which fluctuates within a wellness-illness continuum with optimal-level wellness as the goal. The Nursing Program curriculum addresses acute and chronic health needs and wellness throughout the lifespan.

### **Nursing Practice**

The goal of nursing is to facilitate, maintain, or restore optimal-level wellness as perceived by the patient or to provide support for the dying. Nursing as a discipline draws from a body of evidenced based behavioral and scientific disciplines as well as experiential knowledge. Nursing is a caring profession which applies core values, integrated concepts and outcomes. Nursing is guided by the principles of the American Nurses Association nursing standards of practice and Code of Ethics, all within the legal boundaries of nursing.

The systematic process used for the Associate Degree Registered Nurse (ADRN) is primarily based on seven core values, eight integrated concepts and four outcomes. The foundation is built upon the core values of; caring diversity, integrity, excellence, ethics, patient-centeredness and holism. Integral to nursing practice is the application of eight concepts; context and environment, knowledge and science, personal and professional development, quality and safety, relationship-centered care and teamwork.

The ADRN communicates effectively, collaborates with patients and health care team members and serves as a patient advocate. The ADRN uses evidence based data; engages in practice using reflection and rationale thought, while recognizing the responsibilities and boundaries in the nursing profession.

## Nursing Education

The process of nursing education is based on professional interaction and mutual respect between the student and the teacher. Faculty members serve as role models and facilitators of learning. Faculty strives to provide clinical experiences in which students can apply nursing concepts to a variety of patients in various settings. Nursing concepts are presented and revisited in greater complexity throughout the curriculum. Through knowledge and experience, students are expected to progressively apply concepts in order to reach a level to where they can critically analyze a situation, synthesize and implement a plan of care, and evaluate outcomes. Lifelong learning is valued and necessary owing to the rapid changes in the health care environment, including increased patient acuity, increased demands for knowledge, and the explosion of technology.

Nursing education is a sequence of planned activities and dynamic experiences by which students learn and are socialized into the profession of nursing. The optimal learning environment: supports caring, recognizes differences, committed to excellence, demonstrates open communications, encourages personal/professional growth, and advocates for every person to function according to his or her own values, beliefs and practices.

Faculty members serve as facilitators of learning, providing a learning environment in which nursing concepts are applied in a variety of situations and practice settings. The learning environment stimulates within the student the ability to recognize nursing values and use integrated concepts to critically analyze a situation, synthesize and implement an intervention and, finally, to evaluate the outcomes.

## The Associate of Science in Nursing Graduate

The Associate of Science in Nursing (A.S.N.) graduate is a valuable member of the health care team and the nursing profession. The graduate's practice includes: professionalism, written and spoken communication, assessment, clinical decision making, caring interventions, teaching and learning, collaboration, managing care, concern for safety for both the patient and the health care team. In addition the graduate will learn skills related to: utilization of technology, patient advocacy, nursing diagnoses, prioritization, planning, implementation, delegation, evaluation of outcomes, maintenance of ethical and legal standards, practicing in a cost effective manner, providing for continuity of care, discharge planning. The graduate who possesses the knowledge and skills will have a solid foundation to pursue a Bachelor of Science in Nursing degree.

## Student Learning Outcomes

Student Outcomes	Outcome Measures
Human Flourishing: Upon completion of the MCC Nursing Program; 100% of the nursing students shall: <i>Advocate for patients and families in ways that promote their self-determination, integrity and ongoing growth as human beings.</i> (NLN 2010 p.38)	Course exams 78% > Clinical evaluations 78% > ATI Content Mastery exams Level One - Level three ATI Comprehensive exams Level One – Level three.

<p>Nursing Judgment: Upon completion of the MCC Nursing Program; 100% the nursing students shall: <i>Make judgments in practice, substantiated with evidences that integrate nursing science in the provision of safe, quality care and promote the health of patients within a family and community context.</i> (NLN 2010 p.38)</p>	<p>Course exams 78% &gt; Clinical evaluations 78% &gt; ATI Content Mastery exams Level One - Level three ATI Comprehensive exams Level One – Level three.</p>
<p>Professional Identity: Upon completion of the MCC Nursing Program; 100% of the nursing students shall: <i>Implement one’s roll as a nurse in ways that reflect integrity, responsibility, ethical practices, and an evolving identity as a nurse committed to evidence-based practice, caring, advocacy and safe, quality care for diverse patients within a family and community context.</i> (NLN 2010 p.38)</p>	<p>Course exams 78% &gt; Clinical evaluations 78% &gt; ATI Content Mastery exams Level One - Level three ATI Comprehensive exams Level One – Level three.</p>
<p>Spirit of Inquiry: Upon completion of the MCC Nursing Program; 100% of the nursing students shall: <i>Examine the evidence that underlies clinical nursing practice to challenge the status quo, question underlying assumptions, and offer new insights to improve the quality of care for patients, families, and communities.</i> (NLN 2010 p.38)</p>	<p>Course exams 78% &gt; Clinical evaluations 78% &gt; ATI Content Mastery exams Level One - Level three ATI Comprehensive exams Level One – Level three.</p>

### Program Outcomes

The outcomes of the College’s Associate Degree Nursing Program are to graduate individuals who will care for a patient within a family or context of a community and are prepared to:

- Human Flourishing: Advocate for patients and families in ways that promote their self-determination, integrity, and ongoing growth as human beings. (NLN, 2010 p. 38)
- Nursing Judgment: Make judgments in practice, substantiated with evidence, that integrate nursing science in the provision of safe, quality care and promote the health of patients within a family and community context. (NLN, 2010 p. 38)
- Professional Identity: Implement one’s role as a nurse in ways that reflect integrity, responsibility, ethical practices, and an evolving identity as a nurse committed to evidence-based practice, caring, advocacy, and safe quality care for diverse patients within a family and community context. (NLN, 2010 p. 38)
- Sprit of Inquiry: Examine the evidence that underlies clinical nursing practice to challenge the status quo, question underlying assumptions, and offer new insights to improve the quality of care for patients, families, and communities. (NLN, 2010 p. 38)

Program Outcomes	Outcome Measures
<p>1. Retention Rates 80% of students who are accepted and attend orientation will complete the program</p>	<p>1. Measured by retention data, located in the Director of Nursing office.</p>
<p>2. Completion Time 80% of students who begin the Nursing program will graduate in four (4) semesters.</p>	<p>2. Measured by transcripts and advising records.</p>
<p>3. NCLEX Pass Rates 88% (or within 4% points of national average) of graduates will pass NCLEX on first attempt.</p>	<p>3. Measured by annual NCLEX Pass Rates</p>
<p>4. Graduate Satisfaction Data collected from graduate nurses will reveal a cumulative 85% nursing program satisfaction.</p>	<p>4. Measured by Graduate Satisfaction Questionnaire administered within 6-12 months post-graduation by the Vice President of Student Success and Institutional Research.</p>
<p>5. New Graduate Employment 85% of graduates will be employed as an RN within six-twelve (6-12) months post-graduation.</p>	<p>5. Measured by Graduate Satisfaction Questionnaire administered within 6-12 months post-graduation by the Vice President of Student Success and Institutional</p>

	Research.
6. Employer Satisfaction 85% of employers of graduates will express satisfaction with the program.	6. Measured by Employer Satisfaction Questionnaire administered by the Director of Nursing 6-12 months post-graduation.

### Organizational Framework

The curriculum is organized around two established entities: National League of Nursing (NLN) and the nursing theorist, Dr. Patricia Benner. NLN offers three main elements which incorporates Benner’s work on apprenticeships. Benner’s apprenticeships are based on three concepts; Knowledge, Practice and Ethical Comportment. (Benner, 2009; Benner et al., 2009). NLN with input from Dr. Benner have designed a comprehensive nursing education model. This model has been adopted as the organizational framework for Miles Community College nursing curriculum. NLN’s recommendations for educational competencies include; seven core values, six integrated concepts and four core competencies. The three apprenticeships define the six concepts.

#### Core Values:

Caring: “Promoting health, healing and hope in response to the human condition.”

Diversity: “Recognizing differences among “persons, ideas, values and ethnicities.”

Excellence: “Creating and implementing transformative strategies with daring ingenuity.”

Integrity: “Respecting the dignity and moral wholeness of every person without conditions or limitations.”

Ethics: “Reflective consideration of personal, societal, and professional values, principles, and code that shape nursing practice.”

Holism: “The culture of human caring that affirms the human person as unique and complex.”

Patient Centeredness: “A patient centered approach which supports optimal health outcomes.” (NLN 2007) (NLN 2010)

**Integrating Concepts & Apprenticeships:** *Apprenticeships are primary to each integrated concept.*

Context and Environment: An organization’s human resources, policies, procedures and other attributes that influence interpersonal interactions.

Knowledge and Science: Nursing draws on knowledge from many disciplines: biological sciences, social sciences, humanities and arts to deepen and generate new knowledge and theories providing a foundation to further the practice of nursing.

Personal and Professional Development: Integrating values to develop ethical behaviors and courage to continually improve holistic care of patients, families and communities.

Quality and Safety: Provide safe, quality, evidence-based care consistent with current professional knowledge.

Relationship-Centered Care: Caring and therapeutic relationships with patients, families, communities and members of the health care team reflecting diversity, integrity, civility, mutual trust, grace and empowerment.

Teamwork: Collaborate effectively within nursing and interprofessional teams, encompassing open communication, mutual respect, and shared decision making to achieve quality patient care.

(NLN, 2010)

## Apprenticeships

Knowledge: Incorporates the body of science and theory

Practice: Ability to engaging in practice using careful reasoned thinking

Ethical Comportment: Works within a set of recognized values and responsibilities.

(NLN 2010)

## Clinical Progression

As students' progress through the semesters of ADRN clinical nursing education, integration of previously learned concepts and skills with new concepts and skills is expected. The following chart identifies the levels of expected performance in a cumulative manner.

### Clinical Progression

	First Semester	Second Semester	Third Semester	Fourth Semester
<b><u>Human Flourishing:</u></b> Advocate for patients and families in ways that promote their self-determination, integrity, and ongoing growth as human beings. (NLN, 2010)				
<b>Context and Environment:</b> An organization's human resources, policies, procedures and other attributes that influence interpersonal interactions.	<u>Knowledge:</u> Begins to define health promotion/disease prevention within organizations and social systems.	<u>Knowledge:</u> Applies health promotion/disease prevention within organizations and social systems.	<u>Knowledge:</u> Differentiates between health promotion/disease prevention within organizations and social systems.	<u>Knowledge:</u> Evaluates health promotion/disease prevention within organizations and social systems.
	<u>Practice:</u> Begins to understand data as it relates to strategies for health promotion and disease prevention.	<u>Practice:</u> Applies data as it relates to strategies for health promotion and disease prevention.	<u>Practice:</u> Distinguishes data as it relates to strategies for transcultural health promotion and disease prevention	<u>Practice:</u> Interprets data as it relates to strategies for transcultural health promotion and disease prevention.
	<u>Ethical Comportment:</u> Begins to understand legal and regulatory requirements, including HIPPA, for faculty, students, patients and families within organizations and social systems.	<u>Ethical Comportment:</u> Applies legal and regulatory requirements, including HIPPA, for faculty, students, patients and families within organizations and social systems.	<u>Ethical Comportment:</u> Analyzes legal and regulatory requirements, including HIPPA, for faculty, students, patients and families within organizations and social systems.	<u>Ethical Comportment:</u> Evaluates legal and regulatory requirements, including HIPPA, for faculty, students, patients and families within organizations and social systems.
<b>Knowledge and Science:</b> Nursing draws on knowledge from many disciplines; biological sciences, social sciences, humanities and arts to deepen and generate new knowledge and theories	<u>Knowledge:</u> Begins to understand relationships between knowledge/science and a) quality and safe patient care, b) excellence in	<u>Knowledge:</u> Recognizes relationships between knowledge/science and a) quality and safe patient care, b) excellence	<u>Knowledge:</u> Analyzes relationships between knowledge/science and a) quality and safe patient care, b) excellence in	<u>Knowledge:</u> Evaluates relationships between knowledge/science and a) quality and safe patient care, b) excellence

providing a foundation to further the practice of nursing.	nursing, and c) professional advancement	in nursing, and c) professional advancement	nursing, and c) professional advancement	in nursing, and c) professional advancement
	<u>Practice:</u> Begins to use data bases for practice, administrative, education, research purposes; electronic documentation and related software applications	<u>Practice:</u> Applies data bases for practice, administrative, education, research purposes; electronic documentation and related software applications	<u>Practice:</u> Discriminates data bases for practice, administrative, education, research purposes; electronic documentation and related software applications	<u>Practice:</u> Supports data bases for practice, administrative, education, research purposes; electronic documentation and related software applications
	<u>Ethical</u> <u>Comportment:</u> Begins to examine personal beliefs, values, and biases with regards to respect for person, human dignity, equality, and justice within organizations and social systems.	<u>Ethical</u> <u>Comportment:</u> Recognizes personal beliefs, values, and biases with regards to respect for person, human dignity, equality, and justice within organizations and social systems.	<u>Ethical</u> <u>Comportment:</u> Differentiates personal beliefs, values, and biases with regards to respect for person, human dignity, equality, and justice within organizations and social systems.	<u>Ethical</u> <u>Comportment:</u> Examines personal beliefs, values, and biases with regards to respect for person, human dignity, equality, and justice within organizations and social systems.
<b>Personal/Professional Development:</b> Integrating values to develop ethical behaviors and courage to continually improve holistic care of patients, families and communities.	<u>Knowledge:</u> Begins to recognize creativity/critical thinking skills and attitudes related to the nursing process.	<u>Knowledge:</u> Demonstrates creativity/critical thinking skills and attitudes related to the nursing process.	<u>Knowledge:</u> Critiques creativity/critical thinking skills and attitudes related to the nursing process.	<u>Knowledge:</u> Modifies creativity/critical thinking skills and attitudes related to the nursing process.
	<u>Practice:</u> Defines problem-solving skills in managing conflict and identifying problems.	<u>Practice:</u> Begins to demonstrate problem-solving skills in managing conflict and identifying problems.	<u>Practice:</u> Exhibits problem-solving skills in managing conflict and identifying problems.	<u>Practice:</u> Evaluates problem-solving skills in managing conflict and identifying problems.
	<u>Ethical</u> <u>Comportment:</u> Begins to understand respect, caring and compassion for all persons.	<u>Ethical</u> <u>Comportment:</u> Demonstrates respect, caring and compassion for all persons.	<u>Ethical</u> <u>Comportment:</u> Models respect, caring and compassion for all persons.	<u>Ethical</u> <u>Comportment:</u> Courage to be innovative with respect, caring and compassion for all persons.
<b>Quality and Safety:</b> Provide safe, quality, evidence-based care consistent with current professional knowledge.	<u>Knowledge:</u> Recognizes factors that contribute to a system wide safety culture.	<u>Knowledge:</u> Demonstrate factors that contribute to a system wide safety culture.	<u>Knowledge:</u> Analyze factors that contribute to a system wide safety culture, including sentinel events and root-cause analysis.	<u>Knowledge:</u> Analyze factors that contribute to a system wide safety culture, evaluating system effectiveness.
	<u>Practice:</u> Identify	<u>Practice:</u>	<u>Practice:</u>	<u>Practice:</u>

	and professionally communicate potential risk factors and actual errors.	Communicates effectively with healthcare team, patients, families to minimize potential risk factors and actual errors	Communicates effectively utilizing hand-off among providers and across transitions in care to minimize potential risk factors and actual errors	Evaluates effectiveness of communication with healthcare team, patients, families to minimize potential risk factors and actual errors
	<u>Ethical</u> <u>Comportment:</u> Begins to appreciate cognitive and physical limits of human performance.	<u>Ethical</u> <u>Comportment:</u> Recognizes cognitive and physical limits of human performance	<u>Ethical</u> <u>Comportment:</u> Analyzes cognitive and physical limits of human performance	<u>Ethical</u> <u>Comportment:</u> Evaluates cognitive and physical limits of human performance
<b>Relationship-Centered Care:</b> Caring and therapeutic relationships with patients, families, communities and members of the health care team reflecting diversity, integrity, civility, mutual trust, grace and empowerment.	<u>Knowledge:</u> Begins to recognize the role of family, culture and community in a person's development.	<u>Knowledge:</u> Explains the role of family, culture and community in a person's development.	<u>Knowledge:</u> Analyzes the role of family, culture and community in a person's development.	<u>Knowledge:</u> Evaluate effectiveness of the role of family, culture and community in a person's development.
	<u>Practice:</u> Communicates information effectively; listen openly and cooperatively.	<u>Practice:</u> Engages in effective communication utilizing integrity and civility.	<u>Practice:</u> Analyze factors that enhance or hinder effective communication.	<u>Practice:</u> Modify factors that enhance or hinder effective communication.
	<u>Ethical</u> <u>Comportment:</u> Begins to appreciate the patient as a whole person, with his/her own life story and ideas about the meaning of health or illness.	<u>Ethical</u> <u>Comportment:</u> Recognizes the patient as a whole person, with his/her own life story and ideas about the meaning of health or illness	<u>Ethical</u> <u>Comportment:</u> Examines the patient as a whole person, with his/her own life story and ideas about the meaning of health or illness	<u>Ethical</u> <u>Comportment:</u> Supports the patient as a whole person, with his/her own life story and ideas about the meaning of health or illness
<b>Teamwork:</b> Collaborate effectively within nursing and interprofessional teams, encompassing open communication, mutual respect, and shared decision making to achieve quality patient care.	<u>Knowledge:</u> Begins to recognize contributions of other individuals and groups in helping patients/families/communities achieve health goals.	<u>Knowledge:</u> Explain contributions of other individuals and groups in helping patients/families/communities achieve health goals.	<u>Knowledge:</u> Utilizes contributions of other individuals and groups in helping patients/families/communities achieve health goals.	<u>Knowledge:</u> Supports contributions of other individuals and groups in helping patients/families/communities achieve health goals.

	<u>Comportment:</u> Begins to appreciate the influence of systems on health care outcomes.	<u>Comportment:</u> Expresses ethical challenges presented by uncertain situations and self-evaluating several “right” answers rather than limiting to one.	<u>Comportment:</u> Analyzes ethical challenges presented by uncertain situations and self-evaluating several “right” answers rather than limiting to one.	<u>Comportment:</u> Evaluates ethical challenges presented by uncertain situations and self-evaluating several “right” answers rather than limiting to one.
<b>Knowledge and Science:</b> Nursing draws on knowledge from many disciplines; biological sciences, social sciences, humanities and arts to deepen and generate new knowledge and theories providing a foundation to further the practice of nursing.	<u>Knowledge:</u> Begins to understand the elements of the research process and methods of scientific inquiry.	<u>Knowledge:</u> Recognize the elements of the research process and methods of scientific inquiry.	<u>Knowledge:</u> Integrate elements of the research process and methods of scientific inquiry.	<u>Knowledge:</u> Support elements of the research process and methods of scientific inquiry.
	<u>Practice:</u> Begins to systematically reflect upon practice, as a basis for the generation of new knowledge and innovation.	<u>Practice:</u> Systematically reflects upon practice, as a basis for the generation of new knowledge and innovation.	<u>Practice:</u> Systematically reflects and applies to practice, as a basis for the generation of new knowledge and innovation.	<u>Practice:</u> Systematically reflects and questions practice, as a basis for the generation of new knowledge and innovation.
	<u>Ethical Comportment:</u> Begins to maintain a questioning mind and spirit of inquiry.	<u>Ethical Comportment:</u> Maintains a questioning mind and spirit of inquiry.	<u>Ethical Comportment:</u> Maintains a questioning mind and spirit of inquiry and courage to learn from weaknesses.	<u>Ethical Comportment:</u> Maintains a questioning mind and spirit of inquiry and courage to learn and generate professional growth.
<b>Personal/Professional Development:</b> Integrating values to develop ethical behaviors and courage to continually improve holistic care of patients, families and communities.	<u>Knowledge:</u> Begins to familiarize oneself with role boundaries to improve holistic care of patients, families and communities.	<u>Knowledge:</u> Identifies and begins to practice within role boundaries to improve holistic care of patients, families and communities.	<u>Knowledge:</u> Practices within role boundaries to improve holistic care of patients, families and communities.	<u>Knowledge:</u> Discern role boundaries to improve holistic care of patients, families and communities.
	<u>Practice:</u> Begins to identify non-linear problem solving techniques.	<u>Practice:</u> Select techniques to engage in non-linear problem solving.	<u>Practice:</u> Begins to examine and employ tools for non-linear problem solving and conflict management.	<u>Practice:</u> Develop and apply non-linear problem solving and conflict management techniques.
	<u>Ethical Comportment:</u> Begins to identify personal beliefs, values and biases.	<u>Ethical Comportment:</u> Begins to modify response to personal beliefs,	<u>Ethical Comportment:</u> Modifies personal beliefs, values and biases to those of	<u>Ethical Comportment:</u> Relates personal beliefs, values and biases to those of

		values and biases.	patients, families and communities.	patients, families and communities.
<b>Quality and Safety:</b> Provide safe, quality, evidence-based care consistent with current professional knowledge.	<u>Knowledge:</u> Begins to describe the importance of QSEN and informatics in evidence-based nursing practice.	<u>Knowledge:</u> Demonstrates the importance of QSEN and informatics in evidence-based nursing practice.	<u>Knowledge:</u> Applies QSEN to recognize and evaluate sentinel events in evidence-based nursing practice.	<u>Knowledge:</u> Supports and defends QSEN in evidence-based nursing practice.
	<u>Practice:</u> Begins to demonstrate use of informatics systems.	<u>Practice:</u> Demonstrates use of informatics systems.	<u>Practice:</u> Model use of informatics systems.	<u>Practice:</u> Compares and contrasts informatics systems.
	<u>Ethical</u> <u>Comportment:</u> Begins to recognize the importance of lifelong learning to keep professional informatics knowledge current.	<u>Ethical</u> <u>Comportment:</u> Recognizes the important of lifelong learning to keep professional informatics knowledge current.	<u>Ethical</u> <u>Comportment:</u> Engages in lifelong learning to keep professional informatics knowledge current.	<u>Ethical</u> <u>Comportment:</u> Values lifelong learning to keep professional informatics knowledge current.
<b>Relationship-Centered Care:</b> Caring and therapeutic relationships with patients, families, communities and members of the health care team reflecting diversity, integrity, civility, mutual trust, grace and empowerment.	<u>Knowledge:</u> Identifies health care approaches of other disciplines and cultures for holistic care.	<u>Knowledge:</u> Employs health care approaches of other disciplines and cultures for holistic care.	<u>Knowledge:</u> Examines health care approaches of other disciplines and cultures to empower holistic care.	<u>Knowledge:</u> Discerns health care approaches of other disciplines and cultures to empower holistic care and reduce disparities.
	<u>Practice:</u> Begins continuous learning and derive meaning from others work.	<u>Practice:</u> Demonstrates continuous learning and derive meaning from others work.	<u>Practice:</u> Employs continuous learning through collaboration and cooperation.	<u>Practice:</u> Facilitates the learning of others.
	<u>Ethical</u> <u>Comportment:</u> Begins to recognize and value diversity.	<u>Ethical</u> <u>Comportment:</u> Recognizes and values diversity.	<u>Ethical</u> <u>Comportment:</u> Affirms and values diversity.	<u>Ethical</u> <u>Comportment:</u> Defends and values diversity.
<b>Teamwork:</b> Collaborate effectively within nursing and interprofessional teams, encompassing open communication, mutual respect, and shared decision making to achieve quality patient care.	<u>Knowledge:</u> Begins to recognize the impact of team functioning on safety and quality of care.	<u>Knowledge:</u> Recognizes the impact of team functioning on safety and quality of care.	<u>Knowledge:</u> Applies concepts of team roles on safety and quality of care utilizing the authority gradient. (chain of command)	<u>Knowledge:</u> Supports team functioning on safety and quality of care while developing strategies for improving systems.
	<u>Practice:</u> Identifies communication techniques that supports effective teamwork	<u>Practice:</u> Demonstrates communication techniques that supports effective	<u>Practice:</u> Analyzes communication techniques that supports effective teamwork	<u>Practice:</u> Emulates communication techniques that supports effective teamwork

		teamwork		
	<u>Ethical</u> <u>Compartment:</u> Begins to identify risks associated with transitions in care or hand-offs.	<u>Ethical</u> <u>Compartment:</u> Identifies risks associated with transitions in care or hand-offs.	<u>Ethical</u> <u>Compartment:</u> Examines the influence of system solutions in achieving effective team functioning.	<u>Ethical</u> <u>Compartment:</u> Values the influence of system solutions in achieving effective team functioning.

## ASSOCIATE OF SCIENCE IN NURSING

### FIRST YEAR

#### Summer Semester

*Pre-requisite for BIOH 201 & 202*

CHMY 120 & 122 Intro to Chemistry **Total Credits 4**

#### Fall Semester

BIOH 201 & 202 Anatomy & Physiology I	4	
CAPP 120 & 120A Introduction to Computers	3	
PSYX 100 Introduction to Psychology	3	
WRIT 101 College Writing I		3
NRSG 101 & 102 Fundamentals of Nursing I	<u>5</u>	
		<b>Total Credits 18</b>

#### Spring Semester

BIOH 211 & 212 Anatomy & Physiology II	4	
PSYX 230 Developmental Psychology	3	
NRSG 103 & 104 Fundamentals of Nursing II	5	
NRSG 156 Pathophysiology		3
NRSG 105 Pharmacology Introduction for Nurses	2	
		<b>Total Credits 17</b>

*\*Summer Semester (effective Su 2015)*

NRSG 205 & 206 Psychiatric Mental Health Nursing 4		
BIOM 250 & 251 Microbiology for Health Sciences	<u>4</u>	
		<b>Total Credits 8</b>

### SECOND YEAR

#### Fall Semester

BIOM 250 & 251 Microbiology for Health Sciences	<u>4</u>	
NRSG 201 & 202 Adult Nursing	9	
NRSG 208 Pharmacology II		2
Math: Required Math Course (M 121, 216)	<u>4</u>	
		<b>Total Credits 19</b>

#### Spring Semester

COMX 111 Public Speaking		3
NRSG 203 & 204 Maternal & Child Health Nursing	7	
NRSG 205 & 206 Psychiatric Mental Health Nursing 4		
NRSG 207 Professional Issues	1	
PHL 110 Ethics or PHL 221 Philosophy & Biomedical Ethics		<u>3</u>
		<b>Total Credits 18</b>

**Total Program Credits = 72 semester credits**

**\*Summer Semester transition for Freshmen Nursing Students 2014 only**

A total of 39 (54%) credits of nursing course requirements

A total of 33 (46%) credits in non-nursing, general education course requirements

NRSG 201 & 202 Adult Nursing and NRSG 203 & 204 Maternal & Child Health Nursing are not sequential; students will be assigned the semester of attendance.

\*\*Students may substitute STAT 216 Introduction to Statistics or M 121 College Algebra to meet this requirement.

**General Policies**

The General Policies for the Miles Community College Nursing Program are in compliance with the Miles Community College Educational Policies found in the current Miles Community College Catalog and Student Planner/Handbook. Due to the nature of the nursing discipline, additional policies have been developed by the Nursing Faculty and are in agreement with the Miles Community College Academic Standards and Curriculum Committee.

**Length of Program**

The Associate Degree Registered Nursing Program is designed to be completed in two academic years (four semesters), with a total of 77 semester credits. Freshmen nursing students are admitted to the nursing Program in the Fall semester of each year. Students may elect to extend completion of the Program requirements over a longer period. This is accomplished by completing all or some of the general education requirements prior to applying for admission to the nursing courses. However, once admitted to the nursing courses, the student must take the required nursing courses consecutively each semester or withdraw from the Program.

The total number of credits for the Nursing Program is done in accordance with the national accrediting body and the governing organization. The guidelines set forth by Accreditation Commission for Education in Nursing, Inc. (ACEN) Nursing Programs should not exceed 76 credits, differences need justification.

Miles Community College is the governing organization of the Nursing Program. The following statement from the 2013-2014 Miles Community College Handbook defines the semester unit credit:

*“College work is measured in terms of semester credits. A “credit” in a lecture class involves one hour of classroom work and two additional hours of outside work or preparation; a credit in a laboratory or clinical class involves two hours of classroom work and one hour of outside work or three hours of classroom work; These weekly guidelines are for a fifteen-week semester (i.e. a three-credit lecture class would meet for 45 lecture hours during the semester). Weekly instructional time is adjusted whenever the semester length does not cover a full 15 week period of time.” (Please refer to the current Miles Community College Student Handbook.)*

**Nursing Program Admissions**

The Miles Community College Nursing Program has a limited enrollment based on the Montana State Board of Nursing approval process. Admission to the Program is competitive and is based largely upon the students’ score on two Assessment Technologies Institute (ATI) exams: the ATI

Test of Essential Academic Skills (TEAS) and ATI Critical Thinking exam scores and a minimum grade point average of 2.75.

Currently the Program is approved to admit thirty freshmen students each fall in Miles City, eight students in Glendive in even number years and eight students in Sidney in odd number years. The complete list of policies and procedures for admission to the Program can be found in the current Miles Community College Catalog. However, changes to policies since the last printing of the catalog may have occurred and students are encouraged to refer to the nursing web page at

<http://www.milesc.edu/DegreesPrograms/AlliedHealth/Nursing/admissionshome.htm> for the most current information. Information for admission of LPNs with advanced standing is included in the policies. Transfer students, students applying for readmission and LPNs can be admitted any semester but on a space available basis only.

### **The Nursing Admissions Committee**

Decisions regarding student admission to the nursing Program are made by the Miles Community College Nursing Admissions Committee. The Committee is comprised of:

- The Director of Nursing, Chairperson
- The Miles Community College Registrar
- One member of the Nursing Faculty to be assigned annually by the Director of Nursing
- Two members of the Academic Division who are involved in non-nursing general education courses, to be assigned annually by the Director of Nursing and Vice President of Academic Affairs

The Nursing Admissions Committee must approve all admissions, re-admissions, transfers, and challenges related to the Registered Nursing Program. The committee meets each April to select applicant admissions for the following Fall and as needed during the remainder of the academic year.

### **Background Check Requirement**

**Purpose:** The purpose of the Miles Community College Nursing Program background check policy is to provide evidence to affiliating clinical agencies regarding the Nursing students' eligibility to participate in clinical activities. Eligibility of students pertains to clinical agency's requirements for all employees, volunteers and students delivering patient care (Joint Commission on the Accreditation of Healthcare Organizations Standard HR.1.20).

**Scope:** This policy applies to all students seeking admission or readmission to, or currently enrolled in, the Miles Community College Nursing Program. Miles Community College has a permissible purpose in requiring a background check for nursing students who provide direct nursing care to vulnerable populations.

**Policy:** Background checks will be conducted, via a contractual arrangement with an outside vendor, as a condition of admission in the nursing Program. Enrollment in a nursing course with a clinical component and direct patient care is contingent upon the student's completion of the background check and subsequent approval of student's background check report by the Nursing Program Admissions Committee and the affiliated clinical agency/agencies. Students will incur the price of the background checks.

The investigation will include, but may not be limited to, a combination of the following screenings for every state and county of residence:

**County Criminal Record Search:**

- 7 year search in unlimited jurisdictions  
Felony / Misdemeanor Convictions
  
- Social Security Report:  
Social Security Number Search  
Alias Name Search  
Residential History Search
- Montana Child Abuse Search:  
Includes Montana Child Abuse Information
- National Sex Offender Public Registry:  
Includes Sex Offender Registries from all 50 states
- FACIS® Level 1:  
Office of Inspector General Excluded Individuals/Entities  
General Service Administration List of Excluded Parties  
Includes OFAC Specially Designated Nationals List

**Confidentiality:** The handling of all records will be strictly confidential and revealed only to those required to have access. Any breach of confidentiality will be considered serious, and appropriate disciplinary action will be taken.

**Procedures:** Informing students of the Background Check policy:

In April of each year, detailed information regarding the background check policy will be provided to students initially accepted into the nursing Program via the mailed nursing Program acceptance letter. General notification informing students of the background check requirement will be included in the Miles Community College catalog nursing information section, available in hard copy or on the college website.

**Self-reporting prior to background check:** Prior to completion of the background check, students will be given the opportunity to self-report adverse information, including an explanation. Questions regarding the student's background are included on the Nursing Program application form. The student's written explanation of any incidents will be given consideration during the Nursing Admissions Committee decision making process.

**Completion dates:** Complete background checks must be less than 12 months prior to admission to the Nursing Program. Freshman, LPNs and transfer students are required to complete the background check by July 15 of the current year. If a student is enrolled in the nursing Program a third year (due to extenuating circumstances), the student must again update by July 15 prior to continuing into the third year.

**Permission to Conduct the Investigation:** A link to the background check vendor is provided on the Miles Community College website. Students pay for the background check online with a

credit card or can arrange with the vendor for an alternate payment method. The student gives permission to conduct the required background investigation and subsequent release of information to the college (Disclosure and Authority to Release Information) via the website and the student's electronic mouse signature. A copy of the student's rights under the Fair Credit Report Act is available through a link on the vendor's website. The results of the background check are emailed to the student in about three (3) to four (4) working days. All of the students' results are available to the Nursing Program Director via an access code on the vendor's website.

**Background Checks and Drug Screen with adverse reports:** If the background investigation results indicate adverse information, the Nursing Program Director (or representative) will notify the student within seven (7) business days via an "Adverse Letter of Notification." The student will have seven (7) business days of the date of this written notice to respond to the Adverse Letter of Notification. The student may:

- Contact the Nursing Program Director
- Provide a written explanation of the adverse information for the Admissions Committee.
- Contest the results of the investigation

Once the student's response has been received, or the seven (7) business days have passed, the Miles Community College Nursing Admissions Committee meets to review any adverse student reports and determines the student's eligibility for clinical course participation and Nursing Program admission or continuation. Students and/or student representatives are not allowed to be present at the Nursing Admissions Committee meeting.

The Nursing Admissions Committee gives consideration to:

- Number of offenses and repeat offenses
- Age of the student at the time of the offense
- Nature and seriousness of occurrence
- Time elapsed since the offense(s)
- Rehabilitation
- Relevance of the crime committed relative to nursing profession standards
- State or federal requirements relative to the nursing profession
- All known information regarding the student, including the written explanation.
- Any other evidence demonstrating an ability to perform clinical and academic expectations competently and free from posing a threat to the health and safety of others.
- The student's written explanation of the adverse information

The Committee reserves the right to confer with legal counsel and the affiliated clinical agencies in determining the student's eligibility. When conferring with outside entities, the student's name is not used, only the adverse information itself. For example, the Committee may ask a clinical facility if someone (without revealing the student's name) who was convicted of a DUI eight years ago would be eligible to access patients in their facility.

The possible actions taken by the Nursing Admissions Committee include:

- Clearing the student for final admission (for students initially applying to the Program, readmission and transfer students) or clearing the student for continuation in the Program (for second and third year students)

- Denying the student final nursing Program admission (for students who are initially applying, being readmitted, or transferring to the Program), or dismissal of the student from the Program (for second and third year students)

Following deliberation of Nursing Admissions Committee, the Nursing Program Director will notify the student of the outcome in writing within three (3) business days. Students who are denied admission to, or terminated from the Nursing Program may submit a written request for reconsideration to the Nursing Admissions Committee within three (3) business days of receipt of the notice of denial/termination.

**Background check requirement continued:**

The student's letter of request shall include a statement of reasons why the student believes the decision should be reconsidered and may include any new supporting documentation. Students who feel the background check report is in error should request that the Committee's final decision be postponed pending the outcome of the re-investigation (please refer to next section). The Nursing Admissions Committee shall within five(5) days of receiving the student's letter of request, consider the request and provide written notification of their decision to the student. The Nursing Admissions Committee's decision is final.

**If the student feels the background check is in error:** If the student contests the accuracy of the background check:

- The student must directly notify the vendor. Detailed vendor contact information will be provided in the letter of notification.
- The vendor is required to re-investigate the disputed information within thirty (30) business days from the date of the student's dispute of the report. The re-investigation report will be sent to the Nursing Program Director.

**Please note: The vendor conducting the background investigation is not responsible for eligibility decisions.**

**Students who refuse to complete the background check and/or sign the Disclosure and Authority to Release Information form will be denied admission and/or terminated from the nursing Program.**

Students who are denied admission and/or terminated from the nursing Program and question the Committee's final decisions are:

- Referred to the Miles Community College academic policies and grievance procedure
- Eligible to reapply for future admission, at which time a current background check must be submitted. The results of the most current background check will be used in the readmission decision.

**Failure to complete any part of this process in the described time frame will automatically result in dismissal from all clinical courses and the Miles Community College Nursing Program. Until a final decision is made, the individual will not be allowed to participate in clinical practicum courses.**

**Any identified misrepresentation, falsification, or material omission of information from the application that is discovered during the acceptance process and deliberation of clinical course eligibility may result in exclusion of the student from continued clinical participation or immediate dismissal.**

**Administration and Interpretations:** Questions about this policy and procedure may be directed to the Miles Community College Nursing Program Director and/or the Nursing Admissions Committee

**Drug Screen.**

**Miles Community College Nursing Program requires that all students in the program submit to a drug screen as outlined in the policy and test negative before engaging in clinical activity associated with the program.**

**Amendments or Termination of this Policy:** Miles Community College Nursing reserves the right to modify, amend, or terminate this policy at any time.

**CPR Requirement must be submitted to Verified Credentials by July 15**

Prior to the first class meeting date of all nursing courses with a clinical component, students must show evidence of completion of Basic Life Support for Healthcare Providers by the American Heart Association. Students are encouraged to keep a copy of their current CPR card in the event proof is required.

Students must maintain current CPR certification **throughout** the nursing Program. Failure to do so will result in the student being barred from clinical activity and therefore dropped from the nursing Program.

**Health History, Immunizations, Basic Health Screening must be submitted to Verified Credentials by July 15**

Completion of the components of the Basic Health Screening for freshmen students and the Health Screening update for the sophomores and re-admitted students is to ensure the safety of both the student and the patients in the affiliating health care agencies. Yearly PPD screenings are required. If a student has a documented allergy or positive PPD, a follow up chest x-ray is required at the student's expense. Hepatitis B and other Hepatitis immunizations are highly recommended for the student's safety but are not required. Students choosing not to take Hepatitis B immunizations will be required to sign a waiver.

**Freshmen** are required to complete the appropriate forms prior to July 15 of the current year of admission. Students may not begin clinical experiences in either an affiliated agency/service or the Miles Community College Nursing Arts Lab until the health screening forms are completed and approved by the Director of Nursing. Health Screening Forms may be downloaded from the MCC website; <http://milescc.edu/DegreesPrograms/AlliedHealth/Nursing/admissionshome.htm> or picked up in the Nursing office, Room 111.

**Sophomores** are required to complete an update form prior to July 15 of the current year. Students may not begin clinical experiences until the form is completed and approved by the Director of Nursing. A delay in completion of this requirement may jeopardize the student's nursing Program admission status. Health Screening Forms may be downloaded from the MCC

website; <http://milescc.edu/DegreesPrograms/AlliedHealth/Nursing/admissionshome.htm> or picked up in the Nursing office, Room 111

### **Insurance**

**Liability insurance** for both freshman and sophomore students are required and are paid for with tuition and fees by the student at the beginning of fall semester each year. Copies of the insurance are available at the student's request. The students are covered **ONLY while assigned to practice as a Miles Community College student nurse in an affiliated clinical facility/service.**

**Should a potentially adverse incidence occur students are required to notify their clinical instructor immediately of an occurrence in the affiliated clinical facility/service. The student and instructor will complete safety and risk surveillance forms for the clinical facility/service.**

**Medical insurance** is provided by each individual student and proof is required. Medicaid is considered adequate coverage. If a student cannot obtain insurance, a waiver must be signed releasing Miles Community College from any responsibility of costs incurred by illness and/or injury. **Waiver forms** may be downloaded from the MCC website; <http://milescc.edu/DegreesPrograms/AlliedHealth/Nursing/admissionshome.htm> or picked up in the Nursing office, Room 111. Waiver forms must be returned to the Nursing office. Students are not covered by Worker's Compensation while in the clinical settings and are responsible for all costs associated with personal injury.

**Should a personal injury take place during a scheduled clinical experience or activity students are required to notify their clinical instructor immediately of an injury in the affiliated clinical facility/service. The student and instructor will complete safety and risk surveillance forms for the clinical facility/service as well as the 'Student First Report of Injury' form required by Miles Community College.**

### **Students with Disabilities**

Miles Community College provides support services for otherwise qualified students with disabilities. The College is committed to providing reasonable accommodations within the scope of the College's Programs and resources to ensure that qualified students with disabilities are able to enjoy the same rights and assume the same responsibilities as any other student. Students with disabilities are required to provide a physician's documentation of their disability to the Disabilities Coordinator in order to arrange for appropriate accommodations. See: [Miles Community College Student Handbook.](#)

### **Faculty Academic Advisors**

Faculty academic advisors are assigned to each student to help guide them through their academic experience at Miles Community College. Every nursing student will have an academic advisor assigned from the nursing faculty for the duration of the Nursing Program. Students are expected to meet with their advisor a minimum of twice a semester to discuss grades, academic plans or problems, course changes, etc. The student or the advisor has the right to request a

change in the faculty advising assignment to facilitate optimal communication. Students are encouraged to confer with advisors as academic problems, conflicts, or concerns arise. (Please refer to the Advising section in the current (Miles Community College Catalog.)

### **Faculty-Student Coordinating Committee (FSCC)**

The Faculty-Student Coordinating Committee provides a forum for the faculty and students to dialog regarding concerns, suggestions and questions regarding the nursing Program, the curriculum and related issues.

The committee is composed of a nursing faculty and elected students. Three students will be elected from the freshman class and three students from the sophomore class. The makeup of the freshmen representatives will be two from Miles City, one from Glendive or Sidney. The makeup of the sophomore representative will be two from Miles City, one from Glendive or Sidney. One alternate representative will be elected for the freshmen and the sophomores at each site. Meetings will be held over the ITV system the last Monday of each month in conjunction with the Nursing faculty meeting.

The responsibilities of the faculty include:

Increasing student awareness regarding Program direction and faculty concerns.

- Providing information and guidance regarding student concerns and participating in follow-up activities as indicated.
- Fostering student/faculty interaction during joint meetings.

The responsibilities of student representatives include:

- Increasing class awareness regarding committee activities.
- Soliciting student information for committee agendas.
- Participating in proposing methods to address agenda items.
- Implementing committee/faculty suggestions and reporting outcomes.
- Contributing to Program policy development.

In addition to the above responsibilities, activities of this committee include participating in the curricular evaluation and modification process as well as the textbook evaluation and selection process.

### **Children in the classroom**

All students have a right to a learning environment free of distractions. Therefore, children and people not enrolled in the nursing Program are not allowed to attend scheduled nursing classroom, clinical or instructional activity. Students are encouraged to plan ahead and make arrangements for childcare including days when their children are ill.

### **Cell phones and electronic devices**

Personal electronic devices may be utilized for instructional activities. Personal electronic devices may not be utilized for personal communication during instructional activities and must be on the 'silent or vibrate' mode. Calls are to be limited to emergency situations only. Students must leave the area in order to answer a call.

### **Social Networking policy**

The Miles Community College Nursing Program abides by the privacy practices and regulations as mandated by the Health Insurance Portability and Accountability Act of 1996 (HIPAA) and provides training for all students. Any documented breach of confidentiality may result in immediate dismissal from the Nursing Program. Any information resulting from the care of a patient or contact with significant others and/or family members is confidential. This information applies to social media and all other forms of electronic networking. It is unprofessional to discuss a patient(s) in any public place or forum.

### **How to Avoid Problems with Social Media**

It is important to recognize that instances of inappropriate use of social media can and do occur, but with awareness and caution, students can avoid inadvertently disclosing confidential or private information about patients.

The following guidelines are intended to minimize the risks of using social media:

1. First and foremost, students must recognize that they have an ethical and legal obligation to maintain patient privacy and confidentiality at all times.
2. Students are strictly prohibited from transmitting by way of any electronic media any patient-related image. In addition, students are restricted from transmitting any information that may be reasonably anticipated to violate patient rights to confidentiality or privacy, or otherwise degrade or embarrass the patient.
3. Do not share post or otherwise disseminate any information, including images, about a patient or information gained in the student nurse-patient relationship with anyone unless there is a patient care related need to disclose the information or other legal obligation to do so.
4. Do not identify patients, patients, facilities or providers by name or post or publish information that may lead to the identification of a patient, patient, facilities or provider. Limiting access to postings through privacy settings is not sufficient to ensure privacy.
5. Do not refer to patients in a disparaging manner, even if the patient is not identified.
6. Do not take photos or videos of patients on personal devices, including cell phones. Follow facility policies for taking photographs or video of patients for treatment or other legitimate purposes using facility-provided devices.
7. Maintain professional boundaries in the use of electronic media. Like in-person relationships, the student has the obligation to establish, communicate and enforce professional boundaries with patients in the online environment. Use caution when having online social contact with patients or former patients. Online contact with patients or former patients blurs the distinction between a professional and personal relationship. The fact that a patient may initiate contact with the nurse does not permit the nurse to engage in a personal relationship with the patient.
8. Consult your clinical instructor or an appropriate leader within the organization for guidance regarding work related postings.
9. Promptly report to your clinical instructor any identified breach of confidentiality or privacy.

10. Be aware of and comply with facility policies regarding use of facility-owned computers, cameras and other electronic devices and use of personal devices in the work place.
11. Do not make disparaging remarks about MCC, MCC employees, any clinical facility or fellow student. Do not make threatening, harassing, profane, obscene, sexually explicit, racially derogatory, homophobic or other offensive comments.
12. Do not post content or otherwise speak on behalf of the facility unless authorized to do so and follow all applicable policies of the facility.

\*\*\*Guidelines are in accordance with National Council of State Boards of Nursing (NCSBN)

### **IT Policy**

Students must have access to a computer with Microsoft Office and internet access. All written assignments will be completed using APA format and submitted to a drop box in eCollege. Instructors will utilize email for communication with students. Because of the blended nature of coursework delivery, it is essential that the student have a properly functioning computer. The student is responsible for allocating computer resources on campus and/or for maintaining proper function of the personal computer. Electron/computer failure does not exempt the student from assignment due dates, coursework requirements or examination deadlines.

### **Pregnancy**

Students who are pregnant or suspect that they may be pregnant should not delay in informing their clinical instructor so that appropriate adjustments and precautions can be made regarding the student's assignment of patients.

### **Formatting of written work**

All written work will conform to the American Psychological Association (APA) Publication Manual format since APA is the format most widely accepted within nursing academia and can be found at [www.apa.org](http://www.apa.org). Please refer to each syllabus for specific grading requirements

### **TurnItIn**

TurnItIn is an academic tool to gauge originality of written assignments. Students are responsible to check course syllabi for instructor requirements on utilizing TurnItIn.

### **Academic Standards**

CHMY 121 & 122 Introduction to Chemistry is a prerequisite for BIOH 201 & 202 Anatomy & Physiology I. Anatomy & Physiology I & II BIOH 201 & 202 and Developmental Psychology (PSYX 230) must have been taken within the last five years immediately prior to admission to the Nursing Program in order to fulfill Program requirements. However, for Anatomy & Physiology (A & P) credits over five years old, an "escrow" mechanism may be utilized. Students with A & P credits over 5 years old or taken at the "100" level will be allowed into NRSB 156 Pathophysiology and credits will be transferred through an "escrow" mechanism. The student's previous A & P coursework will be held in "escrow" until the student has successfully completed Pathophysiology with a "C" (78%) or better. Upon successful completion of NRSB 156, the student will be granted credit for having met the A & P I & II requirements.

**All required Nursing Program courses must be completed with a “C” or higher grade. This includes all general education requirements.** General education courses may be repeated to achieve a “C” grade or above prior to the student’s admission to the nursing courses. Once admitted, students must achieve a “C” or higher in all coursework, including nursing and general education courses, in order to continue in the nursing Program. A “C-” is not a “C” and therefore is not acceptable for the Program. Nursing and general education courses may only be repeated once.

Students must achieve 78% or higher in both theory and clinical components (where there are clinical components) of nursing courses. The theory component grade demonstrates the student’s acquisition of fundamental knowledge. The clinical component grade demonstrates the student’s ability to apply, analyze, and synthesize knowledge. Failure to achieve a minimum of 78% in the theory or clinical area results in the student failing the nursing course. Student must then apply for readmission to the nursing Program. Students can audit only after taking the course for credit. Students interested in auditing nursing courses will need to contact the Nursing Director for more information.

See “Nursing Course Grades” in this handbook for additional information. Also refer to each class syllabus for specific course requirements and grading criteria.

### **Academic and Student Conduct**

The following matters of academic and student conduct are handled in accord with the policies stated in the current [Miles Community College Catalog and Student Planner/Handbook](#).

- Orientation
- Placement Testing
- Advising
- Standard of Student Conduct, Academic Conduct
- Student Access to Records
- Student Disciplinary Procedures
- Temporary Suspension Pending Hearing
- Hearing Procedure
- Student Grievance Procedures
- Drug and Alcohol Abuse

### **Professional Conduct**

Registered nursing in the State is regulated by the Montana State Board of Nursing in accord with the [Montana Code Annotated](#) (MCA) and the Rules derived thereof. It is reasonable that student nurses develop behaviors based on those deemed appropriate to the nursing profession and be disciplined based upon the grounds for unprofessional conduct as indicated in the current Montana Nurse practice Act (MCA section 37-1-316). A copy of the current Statutes and Rules Relating to Nursing can be found on the Montana State Nursing website:

[http://data.opi.mt.gov/bills/mca\\_toc/index.htm](http://data.opi.mt.gov/bills/mca_toc/index.htm)

### **Nursing Program Code of Ethics**

1. I received, read, understand, and agree to the department's Nursing Student Handbook.
2. I understand that each nursing instructor may add additional rules, in writing, specific to their course syllabi. In each of the nursing courses, specific nursing course syllabi will be distributed. It is my responsibility to read and understand the contents of the specific course syllabi, including the attendance policy.
3. I verify that my nursing instructor(s) has requested that I meet with her/him first about course concerns. If the meeting does not resolve the concerns, then my instructor(s) will recommend I meet with the department lead faculty member or the Director of the Nursing Program.
4. I understand that my nursing instructor(s) expects respect from everyone in the classroom at all times. This includes rules about sleeping, inappropriate talking, rudeness, doing homework, answering cell phones, and any disruptive behavior as defined in the Nursing Student Handbook or specific nursing course syllabi.
5. I understand it is my responsibility to complete all assignments on time and that there are penalties for late assignments (if allowed) at each instructor's discretion.
6. I agree that if I do not understand an assignment it is my responsibility to ask for clarification.
7. I understand the instructor's policy about being tardy and the consequences of not following the instructor's course syllabi.
8. I understand the ramifications of missing theory or clinical.
9. I understand that if I miss a class it is my responsibility to get any materials that were handed out during class.
10. I understand it is my responsibility to check my emails daily.
11. I understand that plagiarism of any kind will not be tolerated and will result in receiving a zero (0) for the assignment and failure of the class from Miles Community College.
12. I understand that if I submit three assignments which earn a grade of zero (0), I will receive a failing grade for the semester.
13. I understand that cell phones, iPods, MP3 Players, Smart Phones, Blackberries, and any personal electronic device must be off during class or clinical experiences. If extenuating circumstances dictate that the phone needs to be on, I will notify the instructor. The phone will be in vibrating mode only. Emergent calls that need to be answered will be answered outside of the classroom or clinical area.
14. I understand it is my responsibility to meet ongoing requirements for the nursing program for each semester as listed in the Nursing Student Handbook.

Students failing to comply with the Miles Community College general student policies of conduct or the Nursing Program policies including the Nursing Program Code of Ethics will be placed on warning, probation or dismissal, depending on the severity of the infraction. This process is not necessarily progressive in nature i.e. students may be immediately placed on probation, or be dismissed/expelled from the nursing Program. Refer to removal of Nursing Students from Clinical Settings for specific criteria regarding student behaviors in the clinical area.

### **Academic Dishonesty**

In a case of alleged and admitted academic dishonesty, including cheating and plagiarism, the instructor involved may deal with the matter appropriately, including the issuance of a failing grade for the course. The student may appeal the instructor's decision to the Director of Nursing.

While the Nursing Faculty encourages collaboration, "to work jointly with others especially in an intellectual endeavor" (Webster's New Collegiate Dictionary), it is considered plagiarism when the product of collaboration is represented as one individual's work, or the individual work of a number of students. Therefore, students are cautioned regarding practices which would violate appropriate academic conduct such as dividing an assignment among a group of students and then compiling each component to be used as the final work product of each individual student. This type of sharing decreases the learning opportunity for each student. The result is the development of a fragmented knowledge base upon which to build. These behaviors, in addition to the behaviors described in the current Miles Community College Catalog and Student Planner/Handbook will be addressed as plagiarism.

When a student is informed of suspected academic dishonesty, a student either denies the charge or elects to remain silent. The faculty member involved shall immediately notify the Director of Nursing who will then contact the Academic Council. (See the current Miles Community College Catalog and Student Planner/Handbook.)

Students are given the opportunity to review exams but are not allowed to keep or possess nursing exams. Students are **strictly prohibited** from printing, copying, emailing, taking photos, or by any means replicating exam questions and/or rationales. Students replicating exams and/or rationales will be issued a failing course grade and will be dropped from the nursing Program without consideration for readmission. Students are also prohibited from ordering or obtaining test banks, answer keys, and other faculty resources.

### **Nursing Course Syllabi**

Nursing course syllabi and course related materials are available on-line through eCollege. Nursing students may print syllabi in NAL. Each student is responsible for the material contained within the syllabus. Unless required by the instructor, the cost of any materials used by the student in relation to in-class presentations is solely the responsibility of the student.

### **Nursing Course Grades**

Percentage grading is used throughout the nursing Program. Grades will be evaluated on the following percentage scale:

#### **Class 2014-2015**

**100 -92%    A**  
**91 - 84%    B**  
**83 - 78%    C**  
**77 - 71%    D**  
**70% and below    F**

#### **Class of 2013-2014**

**100 - 93%    A**  
**92 - 84%    B**  
**83% - 78%    C**  
**77% - 71%    D**  
**70% and below    F**

Nursing course grades are composed of two components, theory and clinical. The weighted

value of each component of the course is determined by the time spent in each component, which is reflected in the course credits according to Carnegie units as indicated in the Miles Community College Catalog. At the freshman level in NRS 101/102 and NRS 103/104 (5 credits each) 3/5 of the course grade is calculated from theory and 2/5 from clinical.

At the sophomore level in NRS 203/204 Maternal and Child Health Nursing (7 credits) 3/7 of the grade is calculated from theory and 4/7 is from clinical, in NRS 201/202 Adult Nursing (9 credits) 4/9 of the grade is from theory and 5/9 of the grade is from clinical.

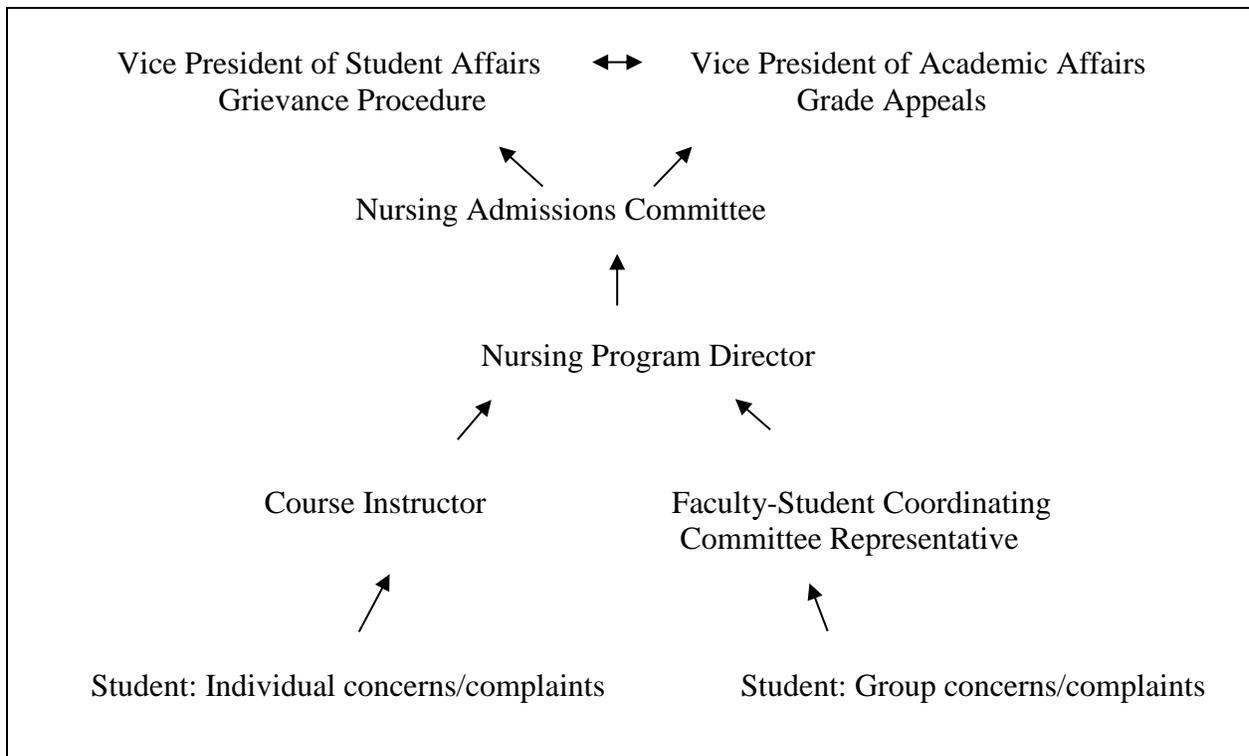

For Psychiatric Mental Health Nursing (NRS 203), 3/4 of the grade is from theory and 1/4 is from clinical.

**A final grade of 78% or higher MUST be attained individually in BOTH the theory and clinical components of any nursing (NRS) course in order for the student to pass the nursing course. Nursing faculty are NOT obligated to “round up”. If a student achieves less than 78% in either the theory or the clinical component, the student will receive a failing grade for the final course grade.**

All written work, clinical assignments, and course requirements must be completed in order for the student to receive a final course grade. Students not completing all assignments and course requirements will receive an “I” incomplete grade and will not be able to progress to the next nursing courses until a “C” grade or better is achieved. Due to the rigors of the Nursing Program students earning an “I” (incomplete grade) for Fall semester must convert the “I” to a passing grade before the beginning of Spring semester. Since faculty are not readily available during non-contracted hours Nursing students are strongly encouraged to complete all assignments to avoid ending a semester with an ‘I’ (incomplete grade). Nursing courses may be taken only twice. Readmission is on a space available basis in nursing courses with enrollment caps (such as, but not limited to, courses with clinical components). The student must meet with and obtain approval from the Nursing Admissions Committee prior to readmission in a nursing course.

### **Student complaints**

It is expected that students will first discuss any and all concerns and complaints regarding academic issues with the course instructor. Open communication and the use of appropriate channels to resolve complaints are key to the student’s academic and professional success. If, after discussing a concern or complaint with the instructor, the student feels that the issue is unresolved, the student may bring the issue to a representative of the Faculty-Student Coordinating Committee or request a meeting with the Nursing Program Director. The Nursing Program Director will meet with the student only after there has been validation that the student has met and discussed the issue with the course instructor. The appropriate channels for students to follow in resolving complaints are as follows:

Students who choose not to follow the appropriate chain of command will be placed on academic warning for immediate and subsequent correction of the behavior. Angry outbursts and/or disrespectful behaviors are unprofessional and may lead to warning, probation, and/or dismissal from the Nursing Program.

### **Theory Components of Nursing Course Grades**

Theory grades are based on tests, quizzes, and required work as indicated in each course syllabus. Course tests will include unit tests and final exams as indicated in each nursing course syllabus.

### **Tests**

Theory tests may be general and/or specific in content. The format may include various question structures such as, but not limited to, multiple choice, multiple multiples, true and false, matching, situational, short answer and/or essay. Due to the privilege of confidentiality, test grades and course grades cannot be released to anyone other than the student and cannot be released over the phone. Test grades will be updated and posted in the eCollege grade book and Mid-term and Final grades will be posted in Banner.

Most nursing tests are on-line and will only be given at the approved testing sites. The use of test proctors requires that students provide photo ID for identification purposes. Students will be asked, prior to the first nursing exam, to designate a testing site. The student will test only at the student's designated testing site.

If used, hard copy nursing tests and finals are scored by hand and grade is documented in eCollege. Students who feel there is a discrepancy in their grade should arrange to meet one-on-

one with the instructor for clarification.

Test anxiety is experienced by all students to some degree. Students experiencing test anxiety must refer to the Miles Community College ADA policy.

### **Make-up Tests**

Make-up tests must be taken within 72 hours of the original test date unless previous arrangements have been made with the course instructor. **It is the student's responsibility to make the necessary arrangements with the instructor for a make-up exam.** The student must request a makeup exam using a 'Student Tardy or Absent' /Appendix B form (page 49). Excused absences will be allowed for instances of illness or family emergencies only. In the case of illness or family emergencies tests may be made up after the scheduled test date.

In the case of absences for things such as doctor appointments, athletic events, job interviews, family weddings and other *pre-scheduled* events, the students must take the exam **prior** to the absence. Distance students shall arrange test date with the course instructor and the Distance Education Coordinator. Students who have a scheduled absence are required to email the instructor using a 'Student Tardy or Absent' /Appendix B form (page 49) at least one week in advance and receive instructor verification of new early test time and date. A different exam covering the same material may be substituted. Failure to make up the exam within 72 hours of the original test date may result in a lower test grade or, at the instructor's discretion, forfeiture of the exam points. Instructor policies on make-up tests can be found in current course syllabi.

**Students missing more than one scheduled exam in any nursing class will be required to appear before the nursing faculty to explain circumstances and submit a written plan for avoiding future absences. This will also result in a written warning. Habitual absences on scheduled exam days may result in the student being dropped from the Nursing Program.**

### **Test Reviews**

Test reviews will be given at the instructor's discretion.

### **Assignments**

Due dates are specified in nursing course syllabi for all assignments. Assignments are due by 11:59 pm on the designated date. Late penalties are as follows:

- 1<sup>st</sup> day (24 hrs.) = 25% deduction off total points
- 2<sup>nd</sup> day (24-48 hrs.) = 50% deduction off total points
- 3<sup>rd</sup> day (48-72 hrs.) = 75% deduction off total points
- More than 72 hrs. = 0 points earned

**The student is required to turn in the assignment to avoid receiving an "I" (incomplete) for the final course grade.**

**Students who have earned a zero on three assignments will receive a failing grade for the course.**

Students having difficulty meeting a due date must submit a 'Student Request Form' /Appendix A (page 48) via email to the course instructor BEFORE the assignment is due. Extensions are granted at the discretion of the individual course instructor. Only one extension per assignment will be granted.

### **Calculators**

The use of calculators during tests is permitted. However, the calculator must be a simple four function calculator. **Electronic devices on which data can be stored are not permitted.**

### **Clinical Components of Nursing Course Grades**

#### **Student Responsibility**

The student must consistently demonstrate intellectual ability, responsibility, and emotional and physical stability throughout the Program. Furthermore, the student must demonstrate a basic understanding of the moral, ethical, and legal responsibilities involved in patient care. Failure to meet these criteria may result in endangerment of the patient. Therefore, the student may be dropped from the Nursing Program.

**Medication administration and performance of any invasive procedure requires successful completion of return demonstration and the direct supervision of the nursing instructor or a designated registered nurse. Failure to comply may result in dismissal of the student from the Nursing Program. Additionally, failure to follow any of the Miles Community College Nursing policies may result in a warning, probation, or suspension.**

#### **Abbreviations in the clinical setting**

Medical abbreviations for charting will be according to each affiliated agency's policies and procedures.

#### **Grading of Student Skills and Performance**

The intent of educational Programs in nursing is to produce practitioners who have acquired a knowledge base, therapeutic and interpersonal skills, and values and attitudes that characterize the nursing profession, are safe for public practice and reflect the guiding principles of the school. Standards are set by the profession and transmitted through the professional education process.

The grading of the skills and performance portion of clinical (including progress notes, return demonstrations and the clinical evaluation tool) is based on the student's level of competency and skill development. Quality of performance is based on degrees of skill development which encompasses the use of time, space, equipment and the expenditure of energy. The competencies are divided into five levels: Independent, Supervised, Assisted, Marginal, and Dependent.

At the **Independent** Level proficiency means unusual efficiency and implies exceptional deftness, use of subtle perceptual cues to modify the behavior to achieve the desired effect and exceptional coordination and integration. The sequence of movements and communication are fluid, even and intertwined. There is an economical use of movements, equipment, and conversation. The behavior is demonstrated within an expedient or minimal time period. The student appears confident and relaxed and only occasionally or subtly expends excess energy in

performance. This level of performance is seen when the student focuses on the patient rather than on the skill that is being performed.

At the **Supervised** Level the student is efficient and coordinated but expends more of his/her energy or that of the patient in accomplishing the behavior. The student appears confident and focuses on the patient but can be distracted to the skill as it becomes more complex. The behavior is performed within a reasonable time period with occasional directive cues.

At the **Assisted** Level the student is skillful in parts of the behavior while the rest of the performance is characterized by inefficiency and lack of coordination, thereby expending excess energy in movements, as in selecting inappropriate supplies in type or number. At times he/she appears anxious, worried or flustered, but makes an effort to appear confident. Accomplishment of the behavior takes longer and the end result is sometimes late. The student focuses more attention on the behavior or on self than on the patient. The student requires frequent verbal and occasional physical directions, in addition to supportive cues.

At the **Marginal** Level the student is skilled, inefficient and expends considerable excess energy in performance; little thought appears to have been given to the sequence of activities that is to be performed. Anxiety may be apparent or masked. Completion of the behavior is considerably delayed to the extent that other activities are disrupted or omitted. The student needs continuous verbal cues and frequent physical ones.

At the **Dependent** Level the student may attempt the procedure but is unsuccessful; unreasonable energy may be expended in attempting the procedure so the student appears unable to move. Verbal and physical cues are so directive and continuous that, essentially, it is the instructor who performs the behavior.

The criteria for clinical evaluation are based on a percentage scale as follows:

SCALE LABEL	STANDARD PROCEDURE	QUALITY OF PERFORMANCE	ASSISTANCE
<b>Independent</b> <b>A 100% - 92%</b> <u><b>(2013-2015)</b></u>  <b>A 100% - 93%</b> <u><b>(2014-2016)</b></u>	Safe & accurate. Effect & affect appropriate each time	Proficient, coordinated, confident. Occasional expenditure of excess energy. Completed within expedient time period.	Without directive cues.
<b>Supervised</b> <b>B 91% - 84%</b> <u><b>(2013-2015)</b></u>  <b>B 92%-84%</b>	Safe & accurate. Effect & affect appropriate each time.	Efficient, coordinated, confident. Some expenditure of excess energy. Completed within a reasonable	Occasional directive cues.

SCALE LABEL	STANDARD PROCEDURE	QUALITY OF PERFORMANCE	ASSISTANCE
<b>(2014-2016)</b>		time period.	
<b>Assisted</b> <b>C 83% - 78%</b>	Safe & accurate each time. Effect & affect appropriate most of the time.	Skillful in parts of behavior. Inefficiency & uncoordinated efforts. Expends excess energy. Completes within a delayed time period.	Frequent verbal & physical cues.
<b>Marginal</b> <b>D 77 - 71%</b>	Safe but not alone. Performs at risk. Not always accurate. Effect & affect occasionally appropriate.	Unskilled, inefficient. Considerable expenditure of excess energy. Prolonged time period needed for completion.	Continuous verbal & physical cues.
<b>Dependent</b> <b>F 70% and under</b>	Unsafe. Unable to demonstrate behavior.	Unable to demonstrate procedure behavior. Lacks confidence, coordination, and efficiency.	Continuous verbal & physical cues.

Adapted from Cottrell, B.H., Cox, B.H., Kelsey, S.K., Ritchie, P.H.J., Rumph, E.A. & Shannahan, M.K. (1996). A clinical evaluation tool for students based on the Nursing Process. JUNE, 25(7), pp. 270-274.

Summative clinical component evaluation is a dual process whereby the students evaluate themselves and then the instructor(s) evaluate the student using the same evaluation tool. The evaluation tool is found in each clinical syllabus. The student participation in the process facilitates development of self-evaluation skills.

### **Clinical Progression – Evaluation Forms**

These include two sections consisting of a self-evaluation and a narrative providing formative evaluation feedback for every clinical experience throughout the clinical rotation.

The student evaluates his/her performance and then the instructor evaluates the student's performance. The student is responsible to read information and contact the instructor if clarification is needed. Student's signature, whether electronic or hard copy, does not indicate agreement but that the student has read and is aware of the information provided by the instructor. The Clinical Progression is a formative evaluation which allows students to identify short term as well as long term clinical progression goals.

Clinical Evaluation forms are summative, or final, reflecting clinical achievement and

progression throughout the semester. The student shall score a minimum of a “C” on each clinical evaluation statement unless otherwise indicated to pass the clinical course.

### **Return Demonstrations (NRS 102 and NRS 104)**

In NRS102 and NRS 104 (Fundamentals of Nursing I & II) there are “return” demonstrations of selected skills which are evaluated utilizing the dependent to independent rating scale previously described. It is necessary that students achieve an overall “C” on “return demonstrations” in order to pass the clinical portion of the course. Furthermore, because the nursing faculty values patient safety, critical components indicated by an (\*) must be demonstrated at the “B” level in order to pass the demonstration satisfactorily.

Students may repeat the return demonstration twice (the original attempt and two additional attempts) if necessary. *The highest achievable average grade for the entire return demonstration on the second and third tries will be 78%.* **Practice is required** between the attempts in order to increase the level of performance. Students are responsible for making an appointment with the instructor for repeat attempts. Failure of the student to keep a mutually agreed upon appointment for a repeat attempt will be counted as one attempt. Skills requiring return demonstrations may not be practiced with patients until students have satisfactorily returned their demonstrations to the nursing faculty member.

Return demonstrations must be completed during the designated week by appointment with a nursing instructor. If a student is unable to satisfactorily complete the return demonstrations after three attempts he/she has failed the clinical component of the nursing course and will receive a failing course grade. The student may re-apply according to the readmission policy.

### **Transition Experience**

The transition experience is a capstone experience at the end of the NRS 201/202 Adult Health semester. The transition experience is assigned during the third or fourth semester of clinical nursing courses. It is designed to facilitate the transition of the student to entry level practitioner within a hospital based setting. The focus of this clinical experience is on the movement of the student from performing in the sheltered environment of the educational setting into functioning within the reality of the work place.

### **Objectives**

- Advocates for patients and families that promote their self-determination, integrity, and ongoing growth as human beings.
- Make judgments in practice, substantiated with evidence, that integrate nursing science in the provision of safe, quality care and promote the health of patient and family in a community context.
- Implement one’s own role as a nurse in ways that reflect integrity, responsibility, ethical practices, and an evolving identity as a nurse committed to evidence based practice, caring, advocacy and safe quality care for diverse patients within a family, and community context.
- Examine the evidence that underlies clinical nursing practice to challenge the status quo, question underlying assumptions, and offer new insights to improve the quality of care of patients, families and communities.

Detailed student role expectations can be found in the “Transition Clinical Experience Packet located in the Adult Health NRSNG 201/202 syllabus.

### **Assessment Tests**

Students will be given standardized web-based assessment testing (ATI) multiple times throughout the curriculum. Students will be tested and compared to national standards immediately after completing Fundamentals of Nursing II, Pharmacology II, Adult Health/Community Nursing, Maternal Child Nursing, Psychiatric Mental Health, and Professional Issues. Students will be assessed for critical thinking skills and application of knowledge.

The nursing Program’s guiding principles for implementing the total curriculum testing Program is to assist the student in identifying strengths and weaknesses early in the Program and providing support and remediation for specific content areas when necessary. The nationally standardized tests provide feedback to the students throughout the Program as to how they compare nationally to other registered nursing students. The standardized tests also provide feedback to the nursing faculty as to the overall course strengths and areas that need to be covered more thoroughly

The ATI testing consists of: Getting Started, Nurse Logic 2.0 – four modules, Learning Systems, Content Mastery Series – Practice/Proctored, Focused Review and Remediation. For each content area, non-proctored practice tests and a secure “proctored” test for each of the major nursing content areas. Students have access to the unsecured, non-proctored practice tests for each course throughout the semester. Towards the end of the nursing course, a “locked” or secure, proctored, assessment test will be given at a designated time. At the instructor’s discretion, the non-proctored and/or the proctored ATI exams may be used as part of the course grade. Each course syllabi outline the course expectations and grading criteria. At the end of the student’s fourth semester, an ATI comprehensive exam will be given. This exam consists of material delivered throughout the two year program of study.

### **Attendance**

#### **Absences**

Due to the structure of the curriculum in the Associate Degree Nursing Program, every class, clinical assignment, and activity is an important learning experience which cannot be repeated in the same manner. Additionally, it is the Program’s objective to ensure that student’s acquire professional, responsible, and accountable behavior. Therefore, it is important to be punctual and attend all classes. When absence occurs, the type of make-up assignment(s) will be determined by the instructor in order to meet the course objectives. “Persistent absenteeism from classes or from the college can also lead to disciplinary action by faculty members, the Financial Aid Director, the Registrar, and/or the Academic Affairs council.” (See current Miles Community College Catalog).

The nursing faculty values the students’ socialization into the role of the professional nurse which includes dependability and accountability. **Students missing or tardy for three classes** (including in any course combination of theory and clinical combined) **are required to appear**

**before the nursing faculty to explain circumstances and submit a written plan for avoiding future absences. This will also result in a written warning. Please refer to Warning, Probation, and Dismissal policy in this handbook.**

### **Absence Procedures**

If students are unable to attend the **clinical lab** they are required to **notify the clinical lab instructor at least one hour in advance.** Make-up lab must be scheduled with the lab instructor within two days of the student's return from absence. The student is responsible to initiate this process. **Absences or tardiness affect the student's academic or clinical performances and may result in a lower grade or in the student being dropped from the nursing course/Program.**

If students are unable to attend **theory class**, they must notify the theory instructor or the Nursing Administrative Assistant **before** the class begins. All assignments must be submitted by the student at the time designated by the instructor.

A **Healthcare Provider release to return to class or clinical lab** is required if a student is **absent for three consecutive classes** (including in any course combination of theory and clinical combined) due to illness. A physician's release may also be required at the instructor's discretion based on the type of illness and consequences to the student, peers, patients and/or other student contacts.

Students who are absent or tardy for clinical or theory need to complete and submit to their instructor the following form: Student Tardy or Absent Form: ***Appendix B page 49. This form is to be submitted the day of the absence (for being tardy) or when returning to class.***

### **Completion of all clinical assignments**

A student must complete **all** assigned clinical experiences and activities in order to achieve a grade for the nursing course. This requirement includes clinical experiences and activities for which there is no written assignment associated with the experience. **There are several clinical activities that cannot be replicated and therefore if not attended students will be unable to make up the experience. In these cases the student may receive a lower grade or a zero (0) for the missed experience. The result of failure to complete all clinical experiences and activities is an "I" or incomplete final course grade.**

### **Requests for written assignment extensions**

Due dates are specified in nursing course syllabi for all assignments. Assignments are due by 11:59 pm on the designated date; late penalties will apply.

**Weekends and holidays are included as late days. The student is required to turn in the assignment to avoid receiving an "I" (incomplete) for the final course grade.**

**Students who have earned a zero on three assignments will receive a failing grade for the course.**

Students having difficulty meeting a due date must submit a 'Student Request Form' /Appendix

A (page 48) via email to the course instructor BEFORE the assignment is due. Extensions are granted at the discretion of the individual course instructor. Only one extension per assignment will be granted.

**Requests for rescheduling of clinical experiences**  
**See Absence Procedures on Page 43**

**Missing a clinical experience or activity without prior arrangements with the instructor will result in a one grade lower for the cumulative end-of-semester final clinical grade. One letter grade level of the final clinical grade will be deducted for each unexcused missed clinical or activity**

**General Clinical Policies**

**Confidentiality**

The Miles Community College Nursing Program abides by the privacy practices and regulations as mandated by the Health Insurance Portability and Accountability Act of 1996 (HIPAA) and provides training for all students. Any documented breach of confidentiality may result in immediate dismissal from the Nursing Program. Any information resulting from the care of a patient or contact with significant others and/or family members is confidential. This information applies to social media and all other forms of electronic networking. It is unprofessional to discuss patient care in the college cafeteria, halls, dorms, or any other public place or forum. It is not acceptable to access medical or personal information of patients who are not assigned to the individual student. Written information is also a source for breach of confidentiality. Notes, care plans, and written assignments should never be exposed to public view, even in the home environment. Patients and health care providers *will not* be identified in written work. Patient information should not be saved on a hard drive at home or at the college. Computer storage devices with assignments should be protected diligently.

People respect others who can keep confidences. Students are encouraged to strive to develop this refined sense of professional responsibility. It is necessary to distinguish between appropriate professional communication and breaking confidentiality. Professional communication transpires between professionals who have a need to know information in order to deliver safe professional care. If a student is in doubt, ASK THE INSTRUCTOR!

**Use of Medical Records**

This section refers to the medical records of all affiliating agencies. With various clinical assignments students will need to utilize the electronic and/or paper medical records. It is a breach of confidentiality to photocopy, print or download a patient's medical record, or any portion thereof. If there are any further questions about the use of medical records contact the clinical nursing instructor.

**Dress Code and Appearance**

As a general rule skin should be covered from your clavicle to your knees.

Nursing students are expected to present a professional, well-groomed appearance when assigned to affiliated agencies, when picking up assignments, or when representing the school. The

**uniform** must be clean and pressed. Uniform tops must cover the buttocks. Uniforms and lab coats are **not to be worn at the college** with the exception of in the Nursing Arts Lab or at post-conferences. Students should NOT attend classes in either the uniform or the lab coat (without permission from instructor.) Dresses should be at knee length.

Uniforms or white (3/4 length) lab coats with name pin are to be worn to clinical areas when **picking up assignments**. **Shorts, sweats, sandals, baseball caps, hats or fanny packs** are not acceptable professional attire with the uniform or lab coat. Students not appropriately dressed or wearing identification may be denied access by facility staff to patient charts and records. Denim jeans are not appropriate as professional dress.

Navy or white sweaters, long sleeved t-shirts or turtlenecks may be worn with the uniform. Wearing a lab coat over the uniform in the clinical area is discouraged as it impedes the patient and staff's ability to distinguish you as a student nurse

The student's **identification/name pin** will include the student's full first and last name. The identification/name pin must be worn at all times when dealing with patients. The pin is to be affixed to the uniform or lab coat on the left upper chest. **If the name pin is lost a report must be made to the Administrative Assistant in the Nursing office in order to assure that confidentiality of medical records may be maintained by notification of affiliated agencies and services.**

With the uniform and the lab coat, the **hair** must be neatly arranged and above the collar. Hair color must be a natural shade and a modest style. Wigs may be worn if neat, clean and of the proper length. Hair clasps, decorative barrettes, ribbons, etc., are not considered professionally appropriate with the uniform. One pair of functional barrettes may be worn.

**Jewelry**, other than wedding and engagement rings may not be worn with the uniform. One pair of plain small post or hoop earrings may be worn. Dangle earrings are not appropriate with the uniform. Other body jewelry in the nose, eyebrow or additional earrings, etc. is not appropriate. Students will be asked to remove additional jewelry and may be denied access to patients. All visible tattoos must be covered unless it is an infection control issue; please consult instructor.

**Shoes** should be plainly designed to facilitate cleaning, with soft soles to reduce the noise level. Shoes should be a solid color (except for a small logo) and must be closed toe and heel. These shoes should be **reserved for clinical use ONLY** and **must be clean at all times**.

Overall good hygiene is expected. Light **make-up** is permitted.

**Perfume** is not permitted as it may be offensive to ill patients (or cause allergic reaction.) Refrain from **gum chewing and eating** while in the patient areas. Students must abide by the smoking regulations of each affiliated agency or service. Students must be aware that smoking odors are offensive, especially to ill patients, and should take precautions and/or necessary steps to avoid smelling of smoke.

**Fingernails** must be kept short to avoid patient injury. **Nail polish** (including clear) or **acrylic**

**nails** are not permitted since chips or rough edges are prone to harbor micro-organisms. No fingernail adornment.

To safeguard **student valuables**, DO NOT take personal items to the clinical areas.

**If a student is employed by the same facility where they are assigned for a clinical experience, the student cannot be “clocked in” as an employee and a student simultaneously. Any deviations from the above policies may result in a lower clinical grade.**

### **Removal of Nursing Students from Clinical Settings**

As professional practitioners, faculty members have an obligation to ensure that nursing students who care for patients are competent to do so without compromising patient care standards. This legal responsibility also extends to the health agency administrator, to all licensed personnel providing care within that agency and, in fact, to the nursing students themselves, all in the interest of safeguarding patient safety.

The student, upon admission to the Miles Community College Nursing Program, assumes the obligation of performing and behaving according to the standards set by the Nursing Program and the nursing profession. **Mere satisfactory academic performance within a clinical course does not constitute the basis for progression through the nursing program.**

Where there is failure on the part of the student to meet reasonable standards of performance or behavior, or when in the judgment of the faculty member, the amount of supervision necessary to ensure patient safety is unreasonable, **the faculty member has the authority to deny the student access to patients and to remove the student from the clinical setting.**

The criteria which will be considered in denying the student access to patients are:

- Breach of HIPAA standards
- Actions and/or events that demonstrate emotional instability in the student
- Threatened bodily harm to patients, staff, faculty, or peers
- Harassment of patients, staff, faculty, or peers
- Suspected to be under the influence of alcohol or drugs
- Indifference or insensitivity to patient safety, comfort, and right to privacy
- Lack of professional judgment
- Disregard for professional ethics
- Unsatisfactory or incomplete preparatory work
- Arrest and conviction of a crime as per Montana State Board of Nursing
- Failure to abide by Miles Community College Nursing dress code and appearance policies
- \* Any health condition which makes it impossible for students to carry out their work without jeopardizing patient or student safety and comfort, or any other condition or circumstance which constitutes an unreasonable risk to the safety and well-being of the patient and/or the student.

\* To progress successfully through the program, pass return skills demonstrations, and function as a nurse after graduation, applicants should have 1) adequate visual acuity with or without corrective lenses to read calibrations on insulin syringes and fine print on drug inserts, 2) adequate hearing ability with or without auditory aids to be able to auscultate breath sounds and understand the normal speaking voice without viewing the speaker's face, 3) adequate physical ability of upper and lower extremities to perform skills such as cardiopulmonary resuscitation and sterile technique correctly, and 4) sufficient speaking ability of the English language to effectively communicate with patients and relay information verbally to others.

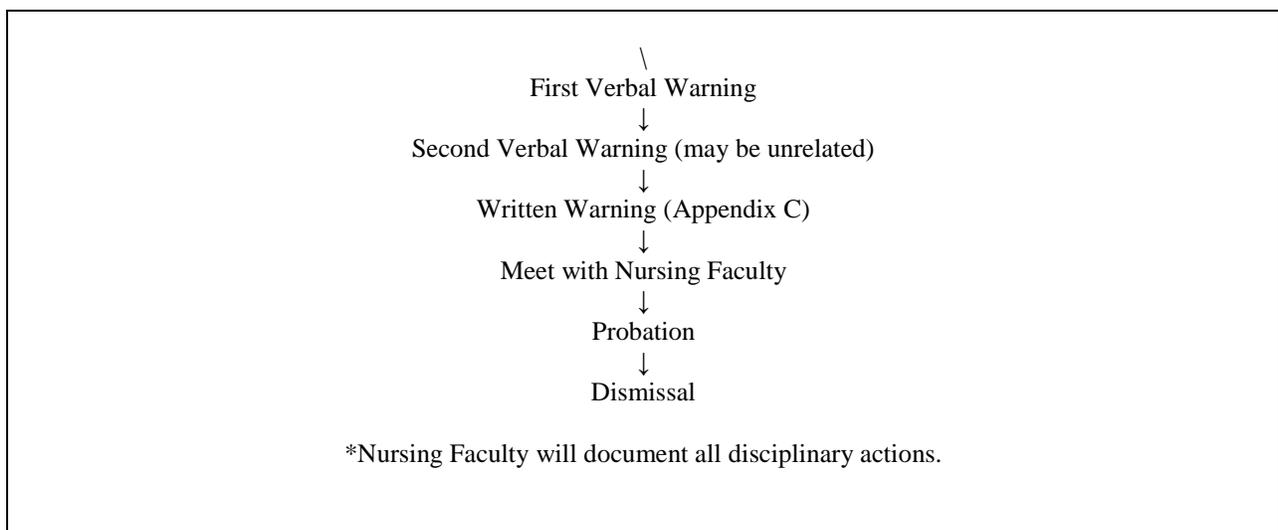

**Once a student has been denied access to patients, either the student will be put on nursing Program warning, probation or will be immediately dismissed from the nursing Program.**

The student shall be fully informed of the decision and its consequences and shall be afforded the right to a hearing according to the institutional grievance procedure. Students placed on probation may be required to meet special conditions such as counseling sessions or other professional help within a stated time frame. **Failure to comply with the written conditions of warning or probation or may result in the student being dismissed from the Nursing Program.**

### **Warning, Probation and Dismissal**

Due to the nature of the nursing discipline in dealing with patient lives and safety, Nursing program procedures for Warning, Probation and Dismissal have been developed by the Nursing faculty and are in agreement with the Miles Community College Academic Standards and Curriculum Committee.

**When a student receives two (2) verbal warnings; the second verbal warning does not have to relate to the first verbal warning. A third infraction constitutes a written warning. The next infraction shall result in a probationary status and the student is required to appear before nursing faculty. *This policy begins with the first semester and is cumulative throughout the Program, warning and/or probation are cumulative; beginning with the verbal warning.***

Suspension as described in the Miles Community College general student policies (student

suspended for five days) is not an option for nursing students. If the student fails to meet probation requirements, including undesirable behavior, exhibits unprofessional behavior, or endangers self, patients, instructors, administration, staff, or fellow students; dismissal can occur immediately.

### **Grievance Procedure**

The grievance procedure may be found in the current Miles Community College Student Handbook/Academic Planner. Before filing a grievance, students are required to follow the chain of command as outlined under Student Complaints (page. 34).

### **Readmission to the Nursing Program**

Students may not be admitted to the nursing Program more than twice (initial admission and one re-admission). *A student could be considered for third admission only if there are unusual circumstances, a recommendation by a member of the nursing faculty, and the unanimous approval of the Nursing Admissions Committee.* Situations that require application for readmission to the Miles Community College Nursing Program include:

- Failure to achieve a “C” or better in any required Associate of Science in Nursing courses.
- Drop/Withdrawal from any Associate of Science in Nursing course.
- Failure to follow the scope and sequence of the Nursing Program.

Other situations that require application for readmission are:

- Failure to abide by Miles Community College general student conduct policies.
- Failure to abide by Miles Community College Nursing Program Policies and Code of Ethics as set forth in this handbook.

Re-admission to the Program will be considered by the Nursing Admissions Committee. Students wishing to apply for readmission must send a letter to the Director of the Nursing Program.

- Request for readmission (include specifics such as original semester and site)
- Reason for leaving the Program.
- Measures that the student has taken to improve the student’s chance of success if granted a second opportunity to complete the Nursing Program.
- Plan for Nursing Program completion
- Contact information including current address, phone number, and email address

The information provided by the student in addition to the following information will be the basis for the Nursing Admissions Committee’s final decision:

- The Miles Community College and Nursing Program stated policies
- The student’s prior academic record and clinical evaluations.
- The student’s current cumulative GPA of 2.75 or higher.
- Space available at time of enrollment
- The content of the student’s request letter

Students seeking readmission are required to meet with the Nursing Admissions Committee for a question and answer meeting. The Nursing Admissions Committee reserves the right to deny readmission of students for reasons other than grades such as un-professional behavior/s and/or attitude. The Nursing Admissions Committee reserves the right to make additional

recommendations for readmission, which could include testing requirements. To avoid repeating courses, the most recent nursing course must be less than one year old. Courses taken more than one year before readmission must be repeated.

It is recommended that students who do not satisfactorily complete a nursing course make an appointment to talk with the Director of Nursing to identify causative factors and to explore educational options prior to meeting with the Nursing Admissions Committee.

### **Distance Education**

Miles Community College is grateful for the opportunity to provide outreach nursing education to students who would otherwise be unable to participate. Nursing students at Interactive Television (ITV) sites are required to sign an ITV Agreement Form. Technical difficulties are sometimes unavoidable. Be respectful of other student's rights; students may be asked to leave the classroom for rude and/or unprofessional behavior. Distance students are Miles Community College students and are expected to abide by Miles Community College policies. Policies for the ITV system are available on line or through the Miles Community College Center for Technology and Distance Education. Distance students will be required to travel to the Miles City campus from time to time according to each course requirements.

### **Final Transcripts**

- MCC Registrar cannot forward transcripts to Montana State Board of Nursing if student has an Incomplete (I) grade.
- A "Transcript Request Form" must be completed in order for a transcript to be sent out. Those forms are available at the Student Services Office or on Miles Community College's website under "Alumni & Friends" or at <http://milescc.edu/DownloadFiles/TranscriptRequestForm.pdf>.
- Final transcripts with the degree posted will not be available until approximately two weeks after the end of the term. Transcript Request Forms will be held until the degree is recorded.

### **Course Transfer Information**

All Nursing courses fulfill the requirements for the Miles Community College Associate of Science in Nursing Degree (A.S.N.). However, these courses may not transfer ~~straight across~~ to another A.S.N. Program. Students are encouraged to keep all syllabi, written work, progress notes, skills checklists, etc. from each of their nursing courses since transfer of nursing course work is often on a case-by-case basis.

**Appendix A**  
**Student Request Form**  
**For changes to clinical schedule and due-dates**  
**Miles Community College Nursing**

Requests for changes to the clinical/lab schedule and written assignment due-date extensions will be granted on a case-by-case basis only for illness or immediate family emergencies or at the instructor's discretion for extreme extenuating circumstances. A completed request form must be submitted for **each** clinical nursing course in which the student is currently enrolled and at least 24 hours prior to the scheduled clinical experience or written work due date in order for the request to be valid.

**Appendix B  
Student Tardy or Absent Form  
For Theory and/or Clinical  
Miles Community College Nursing**

***Tardiness and absence is excused only for illness or immediate family emergencies*** or at the instructor's discretion for ***extreme extenuating circumstances***. A completed tardy or absent form must be submitted for **each** nursing course in which the student is currently enrolled the day student returns to class and/or clinical activities.

**To be completed by the student:**

**Student's name printed:**

**Name of course instructor:**

**Today's date:**

**Time:**

(Verified through email record or through Miles Community College employee verification)

**Date/s of tardiness or absence:**

**Rationale for tardiness or absence:**

**Notified instructor prior to tardiness or absence:**

**Yes**

**No**

**To be completed by the Instructor:**

**Tardiness or absence is: (please circle)**

**Excused**

**Not excused**

**Today's date:**

**Make-up work assignment:**

**Appendix C**  
**MILES COMMUNITY COLLEGE**  
**WARNING, PROBATION AND DISMISSAL NOTICE**

Name of Student: \_\_\_\_\_

You are hereby notified that because of failure to meet, and/or comply with established requirements and regulations, you are:

	Given written warning of deficiencies which must be corrected
	Placed on probation pending satisfactory correction of deficiencies
	Given notice of intent to dismiss

Course of Program: \_\_\_\_\_

Identification of specific unsatisfactory, marginal, or unsafe student performance factors that have resulted in the above action:

\_\_\_\_\_

\_\_\_\_\_

Date by which deficiency (ies) noted above must be satisfactorily corrected or be subject to further disciplinary action: \_\_\_\_\_

Students who fail to meet the requirements for removal of their warning or probationary status by the specified date shall be subject to suspension or expulsion from the course and/or Program involved. Students whose performance, conduct, or behavior while on warning or probationary status is judged to repeat or aggravate the conditions which led to probation, or to disrupt the educational pursuits or endanger the well-being of others, shall be subject to immediate suspension or expulsion from the course(s) and/or Program involved.

\_\_\_\_\_

Appendix D  
Nursing Program Code of Ethics Contract

1. I received, read, understand, and agree to the department's Nursing Student Handbook.
2. I understand that each nursing instructor may add additional rules, in writing, specific to their course syllabi. In each of the nursing courses, specific nursing course syllabi will be distributed. It is my responsibility to read and understand the contents of the specific course syllabi, including the attendance policy.
3. I verify that my nursing instructor(s) has requested that I meet with her/him first about course concerns. If the meeting does not resolve the concerns, then my instructor(s) will recommend I meet with the department lead faculty member or the Director of the Nursing Program.
4. I understand that my nursing instructor(s) expects respect from everyone in the classroom at all times. This includes rules about sleeping, inappropriate talking, rudeness, doing homework, answering cell phones, and any disruptive behavior as defined in the Nursing Student Handbook or specific nursing course syllabi.
5. I understand that my nursing instructor(s) expects respect from everyone in the classroom at all times. This includes rules about sleeping, inappropriate talking, rudeness, doing homework, answering cell phones, and any disruptive behavior as defined in the Nursing Student Handbook or specific nursing course syllabi.
6. I understand it is my responsibility to complete all assignments on time and that there are penalties for late assignments (if allowed) at each instructor's discretion.
7. I agree that if I do not understand an assignment it is my responsibility to ask for clarification.
8. I understand my instructor(s) policy about being tardy and the consequences of not following the instructor's course syllabi.
9. I understand the ramifications of missing theory or clinical.
10. I understand that if I miss a class it is my responsibility to get any materials that were handed out during class.
11. I understand it is my responsibility to check my emails daily.
12. I understand that plagiarism of any kind will not be tolerated and will result in receiving a zero (0) for the assignment and failure of the class from Miles Community College.
13. I understand that if I submit three assignments which earn a grade of zero (0), I will receive a failing grade for the semester.
14. I understand that cell phones, iPods, MP3 Players, Smart Phones, Blackberries, and any personal electronic device must be off during class or clinical experiences. If extenuating circumstances dictate that the phone needs to be on, I will notify the instructor. The phone will be in vibrating mode only. Emergent calls that need to be answered will be answered outside of the classroom or clinical area.
15. I understand it is my responsibility to meet ongoing requirements for the nursing program for each semester as listed in the Nursing Student Handbook.
